It's no accident H.S. Crocker Co., has been successfully operating since 1856.

H.S. Crocker is 100% Employee owned with participation at all levels through team driven production.

Over 150 employees work together in three plant locations: Huntley, IL, Valley

Forge and Exton, PA, all locations adhere to the strict standards of quality as prescribed by the Crosby Quality College.

The Huntley facility, well known for Lidding structures, also produces: Paper and Poly Labels with and without over laminates and adhesives in Roll-to-roll and single cut, Heat-Seal Blister Packs, In-mold

labels, Shrink film and various Specialty Printed Projects for a wide range of applications. Printing on 9 color Flexographic presses from 13" - 32" with front and back print capabilities.

Regular USDA, IL FDA and Pharmaceutical audits keep the Huntley facility on the cutting edge of traceability, which identifies every step in the production process. Recently the Huntley plant became compliant to all HACCP guidelines.

New Developments: H.S. Crocker Co. has developed several new non-foil lidding structures to seal various portions size containers and polymers. For years, customers have asked for a pre die-cut lid other than foil. Metal Detection, Microwaveable, Tear and Puncture Resistance are just a few of the advantages associated with these new materials.

CUP LINE: H.S. Crocker can now offer portion cups (thermoformed and injection molded) in a wide variety of sizes and designs. Let H.S. Crocker develop your new product-specific cup at very competitive cost in PS, PP with and without Barriers. Shipped to you molded or in roll form for your Form-Fill and Seal applications.

H.S. Crocker has positioned themselves as a leader in the Printed Packaging Industry by applying their 150 years of experience towards today's markets. Through the addition of new product lines and redeveloping old lines, H.S. Crocker will continue to offer a Higher Standard of Printed Packaging.
